## **Department of Mathematics & Statistics**

**Concordia University** 

## **MAST 218** Multivariable Calculus I Fall 2016

| Instructor*:    |  |  |
|-----------------|--|--|
| Office/Tel No.: |  |  |
| Office Hours:   |  |  |

**Course Examiner:** Dr. P. Gora

**Prerequisites:** Math 205 or an equivalent Calculus II course.

Multivariable Calculus, 8th Edition by J. Stewart, Cengage Learning, Text:

2015.

Assignments are *very important* as they indicate the level of difficulty **Assignments:** 

> of the problems that the students are expected to solve. Therefore, every effort should be made to do and understand the assignment

**problems.** The assignments will be corrected and graded.

Web Resources: Many excellent animated illustrations to the text of the book are

> collected at the site www.stewartcalculus.com, see TEC (Tools for Enriching Calculus) for the edition 6. Regular use of this resource is

much recommended.

**Use of Computer** 

It is optional but much recommended to install and use Maple or Algebra System: Mathematica. These computer tools can be used to verify and illustrate

any analytical results you get while doing your assignment problems.

**Calculators:** Electronic communication devices (including cell phones) are not

> allowed in the examination rooms. Only "Faculty Approved Calculators" SHARP EL-531 or CASIO FX-300MS) are allowed in the

examination rooms during the midterm exam and the final exam.

<sup>\*</sup>Students should get the above information from their instructor during class time. The instructor is the person to contact should there be any questions about the course.

**Test:** Midterm exam covering the first six weeks will be given in week 8.

**Final Grade:** The highest of the following:

• 90% final exam, 10% assignments.

• 30% midterm, 10% assignments, and 60% final exam.

## Approximate schedule of topics

| Week | Sections     | Topics   |  |
|------|--------------|--|--|
| 1    | 10.1, 10.2   | Parametric equations of curves.                              |  |
| 2    | 10.3, 10.4,  | Areas and lengths in polar coordinates.                      |  |
|      | 10.5         | Conic sections.  |  |
| 3    | 10.6, 11.10, | Conic sections in polar coordinates.                         |  |
|      | 12.1         | Taylor series: review. Three-dimensional coordinate systems. |  |
| 4    | 12.2, 12.3,  | Vectors. Dot product. Cross product.                         |  |
|      | 12.4         |  |  |
| 5    | 12.5, 12.6   | Equations of lines and planes.                               |  |
|      |              | Cylinders and quadric surfaces.                              |  |
| 6    | 13.1, 13.2   | Vector functions and space curves. Derivatives and           |  |
|      |              | integrals of vector functions.                               |  |
| 7    | 13.3, 13.4   | Arc length and curvature of space curve.                     |  |
|      |              | Velocity and acceleration.                                   |  |
| 8    | 14.1, 14.2   | Functions of several variables, their limits and continuity. |  |
| 9    | 14.3, 14.4   | Partial derivatives. Tangent planes and linear               |  |
|      |              | approximation.   |  |
| 10   | 14.5, 14.6   | Chain rule. Directional derivatives and gradient vector.     |  |
| 11   | 14.7         | Maximum and minimum values.                                  |  |
| 12   | 14.8         | Lagrange multipliers.  |  |
| 13   |              | Review   |  |
