## Department of Mathematics & Statistics

Concordia University

**Tutorials:** 

## **MATH 206**

Algebra & Functions Winter 2023

<del></del>
ove information from their instructor during class time. The instructor is the person to contact should there be any
College Algebra, 11th Edition, by Michael Sullivan, Pearson Education, Inc. The textbook will be available at: <a href="https://www.bkstr.com/concordiastore/home">https://www.bkstr.com/concordiastore/home</a> Note: Students should order textbooks as early as possible, especially for printed versions in case books are backordered or there are any shipping delays.
This course is recommended to Psychology students as preparation for their statistics courses. Math 200 or some previous exposure to Algebra is assumed in this course. For this reason, a placement test to help you determine if you are ready for Math 206 is included at the end of this outline. Please take it seriously and consult your instructor or an academic advisor if in doubt.
Your professor will announce her/his office hours during which she/he will be also available to give a reasonable amount of help. Note, however, that if you missed a class is not reasonable to expect your professor to cover the missed material for you.

important resource to help students succeed in this course.

The material in this course requires a lot of practice. There is not enough class time to do all the examples and problems needed to learn the material thoroughly. The Department has therefore organized special tutorial sessions conducted every week to provide additional support to students outside the lecture room environment. These sessions are conducted by tutors who will help with solving problems on the topics learned in class that week, with particular emphasis on the material that students may have difficulties within this course. Students may attend either of the scheduled tutorials and are strongly encouraged to participate and be active at these problem-solving sessions. They are an

Math Help Centre:

A Math Help Centre staffed by graduate students is available. The schedule of its operation will be posted in the Department and on the Department webpage https://www.concordia.ca/artsci/math-stats/services/math-help-centre.html.

MyLabMath:

Every student who buys a textbook will also receive an access code to an online system called **MyLabMath**. Once they have registered for **MyLabMath**, student can download the Pearson e-text 2.0 app so that they can access the textbook from their phone or tablet. The system provides you with a full electronic version of the text (an eBook) as well as many exercises and practice problems. Students will use this system to do online assignments (see **Assignments** below). Students are also strongly encouraged to use this resource to help with problems similar to assignment problems, and in areas where they need extra assistance. If you have an old **MyLabMath** account, please refer to the footnote\* on page 2.

**Assignments:** 

Students are expected to submit assignments online using **MyLabMath**. Late assignments **will not** be accepted. Assignments contribute 10% to your final grade. Working regularly on the assignments is essential for success in this course. Students are also strongly encouraged to do as many problems as their time permits from the list of supplementary problems included in this outline.

Calculators:

Only calculators approved by the Department (with a sticker attached as proof of approval) are permitted for the class test and final examination. For a list of Approved calculators see <a href="http://www.concordia.ca/artsci/math-stats/services.html">http://www.concordia.ca/artsci/math-stats/services.html</a> #calculators.

**Midterm Test:** 

There will be one **midterm test**, based on the material of weeks 1-7, which will contribute up to 20% to your final grade (see the **Grading Scheme** below). The test will be **common** for all sections of this course and will be held on <u>Sunday March 12</u>, 2023, at 1:30 P. M. (Note that Daylight Saving Time begins on Sunday March 12.)

Students who are unable to write the midterm test for a valid reason must write to their instructor to request a 90% final exam. Such a request will not be granted unless it is made in writing (by email), the reason is valid, and is supported by documentation or other evidence. Valid reasons for missing a midterm test include: conflicts with other exams or religious observances (must be reported to the instructor in advance); illness (Short-Term Absence form or valid medical note required); bereavement. Students who miss the midterm test but do not request a 90% final, as described above, will not be granted a 90% final, and will forfeit the marks for the midterm test.

Travel arrangements are not considered a valid reason for missing the midterm test.

**NOTE:** If you are taking another MATH 200 level course with a common midterm test at the same time as this one, you may choose which of the two tests you want to write. You must then inform the instructor of the other course that you will not write that test because of the time conflict between the two courses. In this case, the 90%-10% formula will apply to that other course.

#### MATH 206 – Winter 2023 Page 3

**Final Exam:** 

The final examination will be three hours long and will cover all the material in the course.

**NOTE:** Students are responsible for finding out the date and time of the final exams once the schedule is posted by the Examinations Office. Conflicts or problems with the scheduling of the final exam must be reported directly to the Examinations Office, not to your instructor. It is the Department's policy and the Examination Office's policy that students must be available to take the final exam on the selected date and time. Conflicts due to travel plans will not be accommodated.

**Grading Scheme:** 

The final grade will be based on the higher of (a) or (b) below:

- a) 10% for the assignments,20% for the midterm test,70% for the final exam.
- b) 10% for the assignments, 10% for the midterm test, 80% for the final exam.

**NOTE:** If you miss the midterm test for a valid reason and make a written request, with supporting documentation/evidence, that is approved by your instructor, then your final grade will be based on: 10% for the assignments, 90% for the final exam.

**IMPORTANT:** 

PLEASE NOTE THAT THERE IS NO "100% FINAL EXAM" OPTION IN THIS COURSE.

<sup>\*</sup>If you are repeating this course and have an old **MyLabMath** account, you might be able to get your account extended. To request this, please contact our Pearson representative at <a href="https://example.com">Hannah.Cassidy@Pearsoned.com</a> and provide the following information:

<sup>-</sup> Your full name and Concordia student ID number.

<sup>-</sup> The name of the course, section, and the term you are currently registered in (e.g. MATH 206/Section A – Winter 2023).

## MATH 206 – Winter 2023 Page 5

#### Academic Integrity and the Academic Code of Conduct

This course is governed by Concordia University's policies on Academic Integrity and the Academic Code of Conduct as set forth in the Undergraduate Calendar and the Graduate Calendar. Students are expected to familiarize themselves with these policies and conduct themselves accordingly. "Concordia University has several resources available to students to better understand and uphold academic integrity. Concordia's website on academic integrity can be found at the following address, which also includes links to each Faculty and the School of Graduate Studies: <a href="https://www.concordia.ca/conduct/academic-integrity.html">https://www.concordia.ca/conduct/academic-integrity.html</a>" [Undergraduate Calendar, Sec 17.10.2]

#### **Behaviour**

All individuals participating in courses are expected to be professional and constructive throughout the course, including in their communications.

Concordia students are subject to the <u>Code of Rights and Responsibilities</u> which applies both when students are physically and virtually engaged in any University activity, including classes, seminars, meetings, etc. Students engaged in University activities must respect this Code when engaging with any members of the Concordia community, including faculty, staff, and students, whether such interactions are verbal or in writing, face to face or online/virtual. Failing to comply with the Code may result in charges and sanctions, as outlined in the Code.

#### Use of Zoom

Note: Zoom is included as an institutionally-approved technology. This means we have been assured of the privacy protections needed to use freely within the classroom.

Zoom might be used in this course to facilitate learning at a distance. It may be used to record some or all of the lectures and/or other activities in this course. If you wish to ensure that your image is not recorded, speak to your instructor as soon as possible.

Also, please note that you may not share recordings of your classes and that the instructor will only share class recordings for the purpose of course delivery and development. Any other sharing may be in violation of the law and applicable University policies, and may be subject to penalties.

#### **Intellectual Property**

Content belonging to instructors shared in online courses, including, but not limited to, online lectures, course notes, and video recordings of classes remain the intellectual property of the faculty member. It may not be distributed, published or broadcast, in whole or in part, without the express permission of the faculty member. Students are also forbidden to use their own means of recording any elements of an online class or lecture without express permission of the instructor. Any unauthorized sharing of course content may constitute a breach of the <u>Academic Code of Conduct</u> and/or the <u>Code of Rights and Responsibilities</u>. As specified in the <u>Policy on Intellectual Property</u>, the University does not claim any ownership of or interest in any student IP. All university members retain copyright over their work.

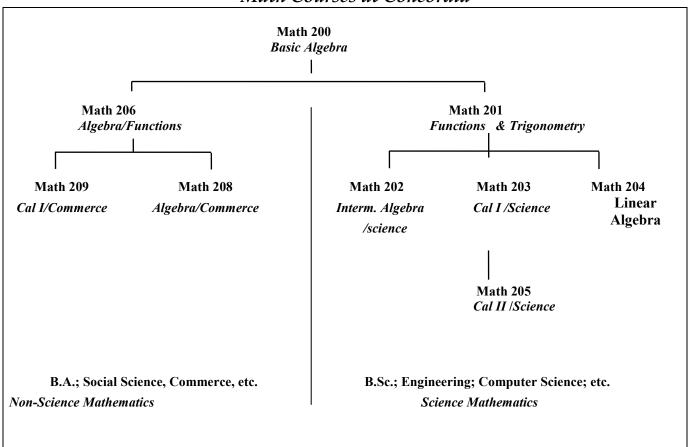

#### Extraordinary circumstances

In the event of extraordinary circumstances and pursuant to the <u>Academic Regulations</u> the University may modify the delivery, content, structure, forum, location and/or evaluation scheme. In the event of such extraordinary circumstances, students will be informed of the change.

### **Choosing Between Math 200 and Math 206**

If the last math course you took was at the high school level (Quebec), and more than five years have passed since, you should probably register for Math 200. If you are still unsure of your level, read on.

#### Math Courses at Concordia

A self-administered test to help you decide between Math 200 and Math 206, follows. Give yourself about 20 or 30 minutes to complete the test. Be honest with yourself, since registering in the wrong course may cost you money and result in a poor grade. Remember that all university level courses usually demand quite a bit of your time. Students in Math 206 will find they will not have time once the course begins to review material that they are expected to know before they enter the course.

**Dropping a course:** If you find yourself "out of your depth" and decide to drop the course, you must drop the course on your My CU Account at <a href="https://hub.concordia.ca/students/account.html">https://hub.concordia.ca/students/account.html</a> before the published deadline. If you just stop going to class without formally discontinuing the course, you will receive an F grade for the course.

# MATH 206 Self-Test (One Mark for each correct answer)

Simplify (write as a single number)

1) 
$$3^2 - 2^3$$

Solve for x:

2) 
$$\frac{6-4(6-4)}{2}$$
  
3)  $\frac{3}{2x-1} = \frac{7}{3x+1}$ 

4) 
$$3x + 10 = 4$$

Expand (multiply out):

5) 
$$(a-b)^2$$

Factor:

6) 
$$x^2 - 16$$

7) 
$$x^2 + 5x + 6$$

Substitute a = 1, b = 1, in the following equations in order to determine whether or not the statement is true or false:

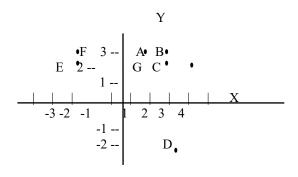

8) 
$$\frac{1}{a} + \frac{1}{b} = \frac{2}{a+b}$$

9) 
$$\sqrt{a+b} = \sqrt{a} + \sqrt{b}$$

Give the missing step or steps:

10) 
$$\frac{a^2 + a}{a+1} = ? = a$$

11) Locate the points (3,2) and (-2,2) on the plane below:

12) Write an algebraic expression for: Twice x is equal to 3 less than half x.

Scoring: 6 or less = Math 200; 7-8 = see an advisor; 9 or better = Math 206.

Answers:

1) 1 2) -1 3) 2 4) -2 5) 
$$a^2 - 2ab + b^2$$
 6)  $(x+4)(x-4)$  7)  $(x+2)(x+3)$  8) False,  $2 \ne 1$  9) False,  $\sqrt{2} \ne 2$  10)  $\frac{a(a+1)}{(a+1)} = a\frac{(a+1)}{(a+1)}$  11) C is (3,2), E is (-2,2) 12)  $2x = \frac{x}{2} - 3$
