Department of Mathematics & Statistics Concordia University

	MATH 201 Elementary Functions <i>Winter 2024</i>	
Instructor:	Ms. S. Karmani, Office: LB 916 (SGW), Phone: 848-2424, Ext. 3260/3223 Email: samaneh.samikermani@concordia.ca	
Textbook:	<i>Precalculus Essentials</i> , by J. Ratti and M. McWaters; Pearson Education. The e-text is included in the MyLabMath system the access card to which can be purchased at https://pearsonhighered.onthehub.com/WebStore/OfferingDetails.aspx?o=6e3f781a-6a91-ea11-812b-000d3af41938	
Office Hours:	Your professor will announce her office hours during which she will be also available to give a reasonable amount of help. Note, however, that if you missed a class it is not reasonable to expect your professor to cover the missed material for you.	
Tutorials:	It takes a great deal of practice to succeed in this course. To complement lectures, the Department has organized weekly tutorials, which are conducted by tutors who will help with solving problems on the topics learned in class that week, with emphasis on the material that students may have particular difficulties within this course. Students are strongly encouraged to actively participate in these problem-solving sessions which can contribute very significantly to students' success in this course.	
Math Help Centre:	A Math Help Centre staffed by graduate students is available. The schedule of its operation and its location will be posted in the Department and on the Department webpage https://www.concordia.ca/artsci/math-stats/services/math-help-centre.html	
WeBWorK:	Every student will be given access to an online system called WeBWorK . The system offers many exercises and practice problems. Students must use this system to do online assignments (see Assignments below). Before each exam (midterm and final), numerous practice problems will be posted on WeBWorK to aid students in their preparation.	
MyLab Math:	Every student who purchases the e-text will be given access to one more online system called MyLab Math . This system contains an e-version of the textbook, as well as a large number of various resources, like practice exercises, typical examples on different topics, often with solutions, video materials, etc., that help you master the course material.	

MATH 201 – Winter 2024 Page 2

Assignments:	Students are expected to submit assignments online using WeBWorK . Late assignments will not be accepted. Assignments contribute 10% to your final grade. Working regularly on the assignments is essential for success in this course. Students are also strongly encouraged to do as many problems as their time permits from the list of recommended problems included in this outline, as well as work on the practice exercises in WeBWorK and in MyLab Math.
Calculators:	Only calculators approved by the Department (with a sticker attached as proof of approval) are permitted for the class test and final examination. For a list of Approved and Not-approved calculators see www.concordia.ca/artsci/math-stats/services.html
Midterm Test:	There will be one midterm test , based on the material of weeks 1-6 (as listed in the CONTENTS below), which will contribute up to 30% to your grade (see the Grading Scheme). The test will be common for all sections of the course and will be held on <u>Sunday March 10</u> , 2024, at 17:30 (i.e. <u>5:30 P.M.</u>).
	Students who are unable to write the midterm test for a valid reason must inform their instructor in advance to request a 90% final exam option in calculating their grade (<i>see below</i>). Such a request will not be granted unless it is made in writing by email, and the reason is accepted as valid and supported by appropriate documentation or other evidence. Valid reasons for missing the midterm test include time conflicts (coinciding exam times) with other exams, religious observances (must be reported to the instructor <i>in advance</i>); illness (to be reported as soon as possible and supported by a valid medical note). Students who miss the midterm test but were not approved for 90% final exam option as described above will not be granted it and will forfeit the marks for the midterm test.
	N.B: Travel arrangements or participation in regular sports events are not considered a valid reason for missing the test.
	NOTE : If you are taking another course with a common midterm test <u>at the same time</u> (NOT just the day) <u>as this one</u> , you may choose which of the two tests you want to write. You must then inform the instructor of the other (to be missed) course that you will not write that test because of the time conflict between the two courses, indicating clearly the second course and its section. In this case, the "90% final +10% assignments" scheme will be applied to calculate your grade.
Final Exam:	The final examination will be three hours long and will cover all the material in the course. NOTE: Students are responsible for finding out the date and time of the final exams once the schedule is posted by the Examinations Office. Conflicts or problems with the scheduling of the final exam must be reported directly to the Examinations Office , not to your instructor .
Grading Scheme:	The final grade will be based on the higher of (a) or (b) below:a) 10% for the assignments, 30% for the midterm test, 60% for the final exam.b) 10% for the assignments, 10% for the midterm test, 80% for the final exam.

Choosing Between Math 200 and Math 201

If the last math course you took was at the high school level (Quebec), and more than five years have passed since you should probably register for Math 200. If you are still unsure of your level, read on.

Math Courses at Concordia

A self-administered test to help you decide between Math 200 and Math 201 follows. Give yourself about 30 minutes to complete the test. Be honest with yourself, since registering for the wrong course may cost you money and result in a poor grade. Remember that all university-level courses usually demand quite a bit of your time. Students in Math 201 will find they will not have time once the course begins to review material that they are expected to know before they enter the course.

Scoring: 15 or less = Math 200; 16-21 = see an advisor; 22 or better = Math 201.
