Tweed Site Day

Hussar AB - Clay Armstrong

10 year project

- We built a hockey arena and curling rink
- All local groups were involved - home and school, building fund, curling club, Agricultural Society, \$-H, Gun Club etc...
- Donations from companies
- We needed approx. 2 million dollars
- We got gov't grants
- Volunteer labour (demolition and building)
- Sold tickets and volunteered for lots of fundraising events
- Farmers donated land, community got together and planted and harvested then sold the product
- The idea was brought forward because our old arena was wore out
- The project is almost paid for, it is booked all winter by our community and other communities as far away as 70 miles
