Aecon

2015 rue Peel, Bureau 600

Montreal, QC H3A 1T8

Dear Hiring Manager,

I am a recent graduate from Concordia University with a master's degree in Civil Engineering, specializing in Construction Management. I would like to submit my application for the Project Manager (Sewer/Water) position that is advertised on your website.

Aecon is an industry leader with a 150+ year history in construction and infrastructure and is currently successfully executing some of the world's most complex infrastructure projects. Aecon has projects all around Canada, including my city of residence, for instance, the Réseau Express Métropolitain (REM) Montréal LRT, which is currently in development, and the Complexe Desjardins landmark project. Being able to witness their projects in person has been impressive and has given me the desire to get involved. As a budding civil engineering professional, I would be excited and humbled to join a company with such an impressive history, reputable track record, and promising future.

At Aecon, the Project Manager (Sewer/Water) is responsible for directly reporting to the Project Director, as well as overseeing and managing the entire scope of the project. To succeed in this position, I believe an ideal candidate should possess general knowledge of non-residential construction methods and building systems, thorough knowledge of change management principles, experience with risk identification and management, and a sound understanding of contractual, commercial, and financial functions. I have acquired all these skills through a combination of my university education, engineering internships, and academic projects.

For more details about my background, please review my enclosed resume. I appreciate your consideration, and I look forward to learning how I can contribute to the success of your company.

Respectfully,

Araave Laghari
