Dear friends and colleagues,

It is with great pleasure that we welcome you all to the 18th annual Chemistry and Biochemistry Graduate Research Conference. This year, we are especially proud to host such a diverse conference. With a wide range of topics, the keynote and graduate presentations are sure to be stimulating and made even better by the participation of various participants and judges. The organizing committee has provided the best environment for graduate students, professors and industry representatives to share and discuss their research and build new connections. We hope this conference will be productive and inspiring to all!

Once again, we would like to extend our gratitude to you all for contributing to the CBGRC this year.

The CBGRC Organizing Committee

Chers amis et collègues,

C'est avec un immense plaisir que nous vous accueillons à la 18ième Conférence sur la recherche aux cycles supérieurs en Chimie et Biochimie. Cette année, nous sommes particulièrement fiers de vous accueillir à une conférence d'une telle diversité. Les conférenciers invités ainsi que les étudiants aux cycles supérieurs vont vous stimuler en présentant un éventail de sujets abordés; améliorés par l'appui des participants et des juges. Le comité organisateur a fait de son mieux pour fournir aux étudiants, professeurs et représentants de l'industrie le meilleur environnement possible pour partager leur recherche et bâtir de nouvelles collaborations. Nous espérons que cette conférence sera productive et inspirante pour tous!! De nouveau, nous tenons à exprimer notre gratitude envers vous tous pour votre participation à la CRCSCB cette année.

Le Comité Organisateur de la CRCSCB

MARCUS LAWRENCE, Ph.D. (1956-2015)

*Professor
Chemistry & Biochemistry,
Concordia University*

In memoriam,

I had the privilege of taking three classes with Dr. Lawrence: Thermodynamics (CHEM 234), Chemical Kinetics (CHEM 235), and Quantum Mechanics (CHEM 333). His approach towards teaching was fun, interactive, and inspiring, and his knowledge regarding the subject matter was extensive. Professor, you shall be sadly missed by a whole generation of students, and I for one am grateful for having learnt from such a brilliant and caring man. Unlike many pedagogues in the university lecture circuit, Dr. L always took the time to get to know each and every one of his students by name, was constantly encouraging, and saw potential in all. Some might say his exams were easier than those of the other teachers, however I highly disagree. The fact that his class's grades were high was a direct testament to his passion towards education, and the time and effort he put into honing his craft.

Lastly, a quotation that I heard some time ago...resonates with the way I feel. It states, “*Who in their life hasn't planted a seed just hoping somehow, something would grow? You may not know or remember all the things that you have done, but everywhere around you seeds are growing, and people are blooming. I know this, because I'm one of them.*”

- James L. Verzelli

KARINE AUCLAIR, Ph.D.

*Associate Professor
Chemistry Department,
McGill University*

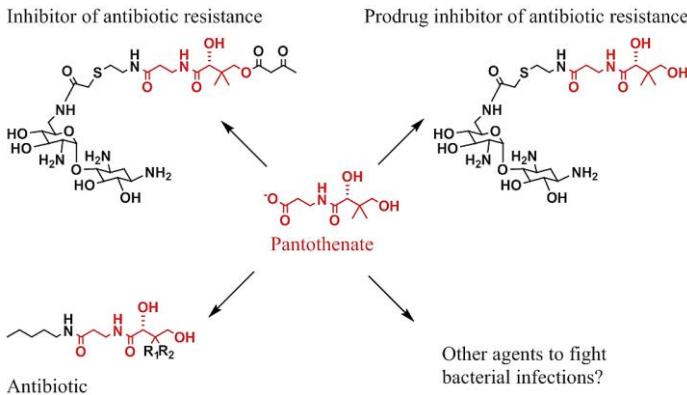

**CONQUERING
ANTIBIOTIC
RESISTANCE WITH A
3-EDGE SWORD: PANTOTHENATE
DERIVATIVES**

Pantothenate, also known as vitamin B₅, is an essential nutrient. It is a precursor in the biosynthesis of coenzyme A (CoA), a cofactor required by >9% of all known enzymes. One such enzyme is aminoglycoside 6'-N-acetyltransferase, or AAC(6'). Expression of AAC(6') by bacteria renders them resistant to aminoglycoside antibiotics. According to the WHO, antibiotic resistance has become such a pressing issue that humanity may regress into a post-antibiotic era where “things as common as strep throat or a child’s scratched knew could once again kill”. Our research group uses a variety of strategies to overcome the problem of antibiotic resistance. Three of them (the 3 edges) take advantage of the pantothenate structural motif.

The first “edge” of our research has involved the synthesis of pantothenate derivatives as AAC(6') inhibitors able to resensitize resistant bacteria to aminoglycoside antibiotics. In order to improve the potency of our AAC(6') inhibitors, the second “edge” has relied on the CoA biosynthetic enzymes to build, in bacteria, highly potent resistance inhibitors from pantothenate derivatives.

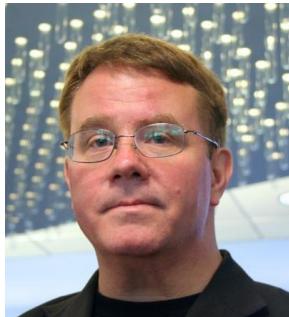

Finally, our third edge against bacteria focuses on pantothenamide derivatives, some of which show interesting

antibacterial or antiplasmodial activity of their own. A fourth “edge” is being developed which might be discussed briefly. Overall this presentation will include some elements of biophysical chemistry but mostly medicinal chemistry with a strong emphasis on biological mechanisms.

JOHN WARNER, Ph.D.

*President, Chief
Technology Officer,
Warner Babcock Institute
for Green Chemistry, LLC*

GREEN CHEMISTRY: THE MISSING ELEMENTS

Imagine a world where all segments of society demanded environmentally benign products! Imagine if all consumers, all retailers and all manufacturers insisted on buying and selling only non-toxic materials! The unfortunate reality is that, even if this situation were to occur, our knowledge of materials science and chemistry would allow us to provide only a small fraction of the products and materials that our economy is based upon. The way we learn and teach chemistry and materials science is for the most part void of any information regarding mechanisms of toxicity and environmental harm. Green Chemistry is a philosophy that seeks to reduce or eliminate the use of hazardous materials at the design stage of a materials process. It has been demonstrated that materials and products CAN be designed with negligible impact on human health and the environment while still being economically competitive and successful in the marketplace. This presentation will describe the history and background of Green Chemistry and discuss the opportunities for the next generation of materials designers to create a safer and more sustainable future.

| Time | Activity | Location |
|-----------------|------------------------------|---|
| 08:00- 09:00 | Registration (All Day) | SP Atrium |
| 09:00- 10:20 | Student Presentations A | Biochemistry (SP-365.01) Analytical Chemistry (SP-457.03) |
| 10:20- 10:50 | Sponsors and Coffee Break | SP-S Atrium and SP Atrium |
| 10:50- 12:00 | Keynote Speaker I | Dr. Karine Auclair (GE-110.00) |
| 12:00- 13:00 | Lunch | SP-S Atrium |
| 13:00- 14:00 | Student Presentations B | Computational and Physical Chemistry (SP-265.29) Molecular Biology (SP-365.01) Environmental Chemistry (SP- 457.03) |
| 14:00- 14:30 | Sponsors and Coffee Break | SP-S Atrium and SP Atrium |
| 14:30- 15:30 | Keynote Speaker II | Dr. John Warner (SP-S110.00) |
| 15:45- 17:30 | Student Presentations C | Inorganic Chemistry and Nanochemistry (SP 265.29) Biochemistry (SP-365.01) Organic Chemistry (SP-457.03) |
| 17:30- 19:30 | Poster Session | SP-S Atrium |
| 17:30- 23:30 | Wine and Cheese | SP-S Atrium |
| All Day | Sponsors | Sponsors and Coffee will be available all day |

ACKNOWLEDGMENTS

We would like to sincerely thank the participants, judges, sponsors and our guest speakers Dr. Karine Auclair (McGill University) and Dr. John Warner (Warner Babcock Institute for green Chemistry, LLC) for making this a highly successful conference.

Our sincerest gratitude goes to Dr. Christine DeWolf, Hilary Scuffell, Dr. Rolf Schmidt, Maria Ciaramella, the Department of Biology, Department of Psychology, Science College, and Concordia Marketing and Communications for their support and expertise. We would like to extend a special thanks to the CBGRC organizing committee for all of their hard work.

We hope you had a wonderful experience at the 18th iteration of the CBGRC and we look forward to seeing you all again next year!

REMERCIEMENTS

Nous tenons à remercier sincèrement les participants, les juges, les commanditaires et les intervenants, Dr. Karine Auclair (McGill University) et Dr. John Warner (Warner Babcock Institute for green Chemistry, LLC), pour avoir participé au succès de cette conférence instructive.

Les plus sincères mercis à Dr. Christine DeWolf, Hilary Scuffell, Dr. Rolf Schmidt, Maria Ciaramella, le département de biologie, département de psychologie, Collège scientifique et communications commercialisation Concordia pour leur soutien et leur appréciation. Nous tenons à remercier particulièrement le comité organisateur de la conférence pour leur dévouement et les longues heures de travail.

Nous espérons que la CRCSCB 2015 fut une expérience très agréable. Nous souhaitons avoir le plaisir de vous compter parmi nous l'année prochaine!
