Queer Power/Art for Global Warming: Green-it-Yourself Citizenship

Atom Cianfarani

Atom Cianfarani is an artist and designer whose practice is founded in the re-purposing of refuse. Working from an ecological preservationist ideology, her design and art practice examines bioremediation as a means to promote renewal in the urban *waste-scape*. She aims to reconcile urban architecture with its surrounding ecological habitats thereby making the urban reality more compatible with our natural world. In her workshop/artist talk, participants will learn how to make a green roof they can take home.
