Instructor: Dr. J. Garrido, Office: LB 921.21 (SGW), Phone: 514-848-2424, Ext. 3252
Email: jose.garrido@concordia.ca
Course webpage: on Moodle.

Office Hours: Tuesdays-Thursdays, 14:00-16:30 or by appointment.

Class Schedule: Tuesdays-Thursdays, 10:15-11:30 in H-401 (SGW Campus).

Goal: The course presents an introduction to statistical estimation techniques for insurance data. It is the natural continuation of Risk Theory, which discusses the probabilistic aspects of insurance portfolios.

Two approaches to credibility theory are discussed: limited fluctuations and greatest accuracy. Topics covered include American, Bayesian and exact credibility. Bühlmann, Bühlmann-Straub, hierarchical and regression credibility models are derived. Generalized linear models and the issue of robustness will also be discussed.

The course prepares for the Credibility part of the Society of Actuaries Exam C and the Casualty Actuarial Society Exam 4. It also covers more advanced material, as needed to use modern credibility with real insurance data. A grade of B or better is needed to apply to the Canadian Institute of Actuaries for exemption of Exam C.

Calculators: The only calculators allowed in tests or at the final exam are those allowed at SOA/CAS exams.

Departmental website: http://www.mathstat.concordia.ca
Internet: Course materials will be posted on the Moodle website.

Assignments: There will be 4 assignments counting for a total of 10% of the final mark. You will hand them in at the beginning of the Thursday lectures in weeks 3, 5, 9 and 11. Undergraduate students are encouraged to work in teams of at most 2 members. Only one assignment per team needs to be handed in. Graduate students are required to complete all assignments individually.

Tests and Final: There will be one class mid-term test in week 6 counting for 40% of the final mark and a final examination counting for the remaining 50% and scheduled by the University Examinations Office during the regular examination period in December. There is no option for a 100% final or supplemental exam.
