

**MATH 200**  
Fundamental Concepts of Algebra  
*Fall 2015*

Instructor\*: \_\_\_\_\_

Office/Tel No.: \_\_\_\_\_

Office Hours: \_\_\_\_\_

\*Students should get the above information from their instructor during class time. The instructor is the person to contact should there be any questions about the course.

**Textbook:** *College Algebra*, Shaum's Outlines (4th Edition). Murray R. Spiegel & Robert E. Moyer. McGraw Hill Education.

**Prerequisite:** None.

**Office Hours:** Your professor will announce her/his office hours during which she/he will be also available to give a reasonable amount of help. Note, however, that if you missed a class it is not reasonable to expect your professor to cover the missed material for you.

**Tutorials:** The material in this course requires a lot of practice. There is not enough class time to do all the examples and problems needed to learn the material thoroughly. The Department has therefore organized special tutorial sessions conducted once per week for one hour for every section of this course to provide additional support to students outside the lecture class time. These sessions are conducted by tutors who will help with solving problems on the topics learned in class that week, with particular emphasis on the material that students may have difficulties with in this course. Students are strongly encouraged to participate and be active at these problem-solving sessions. Tutorials are an important resource to help you succeed in this course.

**Math Help Centre:** In addition to tutorials, a Math Help Centre staffed by graduate students is available. The schedule of its operation will be posted in the Department and on the Department webpage (<https://www.concordia.ca/artsci/math-stats/services/math-help-centre.html>).

**WeBWorkK:** Every student will be given access to an online system called **WeBWorkK**. The system provides you with many exercises and practice problems. Students will use this system to do online assignments (see **Assignments** below). In addition, before the midterm test and before the final exam, a number of practice problems will be posted in WeBWorkK to help you review the material of the course.

**Assignments:** Students are expected to submit assignments online using **WeBWorK**. Late assignments **will not** be accepted. Assignments contribute 10% to your final grade. Working regularly on the assignments is essential for success in this course. Students are also strongly encouraged to do as many problems as their time permits from the chapters of the textbooks listed below in this outline.

**Calculators:** Only calculators approved by the Department (with a sticker attached as a proof of approval), such as **Sharp EL 531** or the **Casio FX 300MS**, available at the Concordia Bookstore, are permitted for the class test and final examination. See <https://www.concordia.ca/content/dam/artsci/math-stats/docs/AppCalculatorList.pdf> for a list of Approved and Not-Approved calculators.

**Midterm Test:** There will be one **midterm test**, based on the material of weeks 1-6, which will contribute up to 30% to your final grade (see the **Grading Scheme** below). The test will be **common** for all sections of this course and will be held on **Sunday November 1, 2015, at 2:00 P.M.** Students who will not be able to write the test that day for a valid reason, e.g. religious (to be reported to the section's **instructor** in advance) or illness (*a valid medical note required*), may write an alternate midterm test on **Saturday November 7, 2015, at 10:00 A.M.**

**NOTE:** It is the Department's policy that tests missed for any reason, **including illness**, cannot be made up. If you miss both the midterm and alternate test **because of illness** (*medical note required*) the final exam will count for 90% of your final grade, and the assignments will count for the remaining 10%.

**Final Exam:** The final examination will be three hours long and will cover all the material in the course. **NOTE:** Students are responsible for finding out the date and time of the final exams once the schedule is posted by the Examinations Office. Conflicts or problems with the scheduling of the final exam must be reported directly to the **Examinations Office, not to your instructor**. It is the Department's policy and the Examinations Office's policy that **students are to be available until the end of the final exam period. Conflicts due to travel plans will not be accommodated.**

**Grading Scheme:** The final grade will be based on the higher of (a) or (b) below:

- a) 10% for the assignments,  
30% for the midterm test,  
60% for the final exam.
- b) 10% for the assignments,  
10% for the midterm test,  
80% for the final exam.

**IMPORTANT:** PLEASE NOTE THAT THERE IS NO "100% FINAL EXAM" OPTION IN THIS COURSE.

Week	Chapters / Sections	Topics
1 (Sept 8)	1 / all 3 / all	Fundamental operations with numbers Properties of numbers
2 (Sept 14)	2 / all	Fundamental operations with algebraic expressions
3 (Sept 21)	6 / all	Fractions
4 (Sept 28)	10 / all	Equations in general
5 (Oct 5)	13 / all 14 / all	Linear equations in one variable Equations of lines
6 (Oct 12)	14 / all 19 / 19.1, 19.2, 19.3	Equations of lines Linear inequalities
7 (Oct 19)	15 / 15.1	Systems of linear equations
8 (Oct 26)	Midterm review	
Sunday (Nov 1)	Midterm	
9 (Nov 2)	7 / all	Exponents
10 (Nov 9)	8 / all	Radicals
11 (Nov 16)	4 / all 5 / all	Special products Factoring
12 (Nov 23)	10 / all 16 / all	Equations in general (revisited) Quadratic equations in one variable
13 (Nov 30)	16 / all	Quadratic equations in one variable Final exam review
