*Students should get the above information from their instructor during class time. The instructor is the person to contact should there be any questions about the course.

Text: *Multivariable Calculus*, 8th Edition by J. Stewart, Cengage Learning, 2015.

Assignments: Assignments are *very important* as they indicate the level of difficulty of the problems that the students are expected to solve. Therefore, every effort should be made to **do and understand the assignment problems**. The assignments will be corrected and graded.

Web Resources: Many excellent animated illustrations to the text of the book are collected at the site www.stewartcalculus.com, see TEC (Tools for Enriching Calculus) for the edition 6. Regular use of this resource is much recommended.

Calculators: Electronic communication devices (including cell phones) are not allowed in the examination rooms. Only "Faculty Approved Calculators" **SHARP EL-531** or **CASIO FX-300MS**) are allowed in the examination rooms during the midterm exam and the final exam.

Test: Midterm exam covering the first six weeks will be given in week 8.

Final Grade: The highest of the following:

- 90% final exam, 10% assignments.
- 30% midterm, 10% assignments, and 60% final exam.

If the grading scheme for this course includes graded assignments, a reasonable and representative subset of each assignment may be graded. Students will not be told in advance which subset of the assigned problems will be marked and should therefore attempt all assigned problems.
