MATH 473 (MAST 666/MAST 841), Sec. A
Partial Differential Equations
Winter 2019

Course Instructor: Dr. A. Kokotov, Office: LB 901-29 (SGW), Phone: 514-848-2424, Ext. 3471
Email: alexey.kokotov@concordia.ca

Prerequisites: MATH 264/265 or an equivalent multivariable calculus course.
MAST 330 or an equivalent course in ordinary differential equations.

Recommended Textbooks:
For more involved reading: Lawrence C. Evans, Partial Differential Equations.
Handwritten (or typed) course notes will be on Moodle.
Online sources might help, too: See, e. g.
https://www.math.uni-leipzig.de/~miersemann/pdebook.pdf
http://web.math.ucsb.edu/~grigoryan/124A.pdf
https://www.ams.org/open-math-notes/omn-view-listing?listingId=110703 etc.

Assignments: Assignments are very important as they indicate the level of difficulty of the problems that the students are expected to solve and understand. Therefore, every effort should be made to do and understand them independently. The assignments will be corrected and a representative sample graded, with solution sets posted weekly. These grades together are worth a maximum of 10%.

Calculators: Electronic communication devices (including cell phones) are not allowed in examination rooms. Only “Faculty Approved Calculators” (SHARP EL-531 or CASIO FX-300MS) are allowed in examination rooms during mid-term and final.

Test: A midterm test covering the first seven weeks will be given in week 8, worth 30% of the total grade.

Final Grade: The highest of the following:
• 100% final exam.
• 30% midterm, 10% assignments, and 60% final exam.

If the grading scheme for this course includes graded assignments, a reasonable and representative subset of each assignment may be graded. Students will not be told in advance which subset of the assigned problems will be marked and should therefore attempt all assigned problems.

### Academic Integrity and the Academic Code of Conduct

This course is governed by Concordia University's policies on Academic Integrity and the Academic Code of Conduct as set forth in the Undergraduate Calendar and the Graduate Calendar. Students are expected to familiarize themselves with these policies and conduct themselves accordingly. "Concordia University has several resources available to students to better understand and uphold academic integrity. Concordia’s website on academic integrity can be found at the following address, which also includes links to each Faculty and the School of Graduate Studies: concordia.ca/students/academic-integrity." [Undergraduate Calendar, Sec 17.10.2]
