Topics: The course will develop the main theme of schemes, following chapter II of Hartshorne's book Algebraic Geometry. We will study sheaves on a topological space, affine schemes (we attach to any commutative ring with identity a pair consisting of a topological space and a sheaf of rings on it, called affine scheme) and finally schemes, which are pairs consisting of a topological space and a sheaf of rings on it which locally are isomorphic to an affine scheme. We'll study properties of schemes and many examples.
