How to Calculate A Grade Point Average (GPA)

Grades have point values:

- A+= 4.3
- B+= 3.3
- C+= 2.3
- D+= 1.3
- A = 4.0
- B = 3.0
- C = 2.0
- D = 1.0
- A- = 3.7
- B- = 2.7
- C- = 1.7
- D- = 0.7

Failed grades have a zero (0) point value:

F, FNS, R, NR

Courses are assigned a specific number of credits:

eg. PSYC 200 = 6 credits
    SOCI 203 = 3 credits
    CHEM 331 = 2 credits

1. Multiply the point value by the credits for the course. The product of this multiplication will be the weighted grade points.

2. Divide the total weighted grade points by the total number of credits to obtain the GPA, (Grade Point Average).

Eg. PSYC 200 A 4.0 x 6 (credits) = 24.0
    SOCI 203 B+ 3.3 X 3 (credits) = 9.9
    CHEM 331 D- 0.7 X 2 (credits) = 1.4
    PHYS 225 F 0.0 X 1 (credits) = 0.0

12 (credits) = 35.3 35.3 ÷ 12 = 2.94 (GPA)
