

CSBN Seminars

Winter / Spring 2014

Center for Studies in Behavioral Neurobiology

Loyola Campus room SP 254-01
Fridays 11:30 am *(unless otherwise noted)*

Jan 31	Dr. Kay Tye Massachusetts Institute of Technology	A unique role for lateral hypothalamic projections to the VTA.
Feb 07	Dr. Dominique Walker McGill University	Early exposure to a high fat diet modifies dopamine neurotransmission and stress responses in the rat offspring.
Feb 28	Dr. Ridha Joober McGill University	Maternal smoking during pregnancy and ADHD: How can environmental risk factors inform genetic research?
Mar 07 9:15 am RF 110	CSBN Spring 2014 Workshop	Neurobiological substrates of learning and memory.
Mar 14	Dr. Barbara Sherwin McGill University	Sex hormones and cognitive functioning in older women and men.
Mar 21	Dr. Jorge Armony McGill University	Neurobiology of human emotional processing.
Mar 28	Dr. Sylvie Belleville Université de Montréal	Building cognitive reserve in the older age: brain plasticity and cognitive training in older adults and persons with mild cognitive impairment.
Apr 04	Dr. Julie Carrier Université de Montréal	Brain mechanisms underlying age-related changes in NREM sleep: contributions from fMRI/MRI studies.
Apr 11	Dr. Steven R. Laviolette University of Western Ontario	The neurobiology of nicotine addiction: dopamine and beyond.
