- 4. LOCATIONS
- 5. PROVINCES
- 6. CONCLUSION

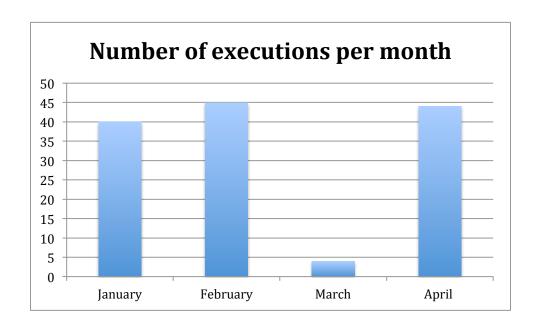

1. INTRODUCTION

Every week, while preparing our Media Monitoring Report on Iran for the Montreal Institute of Genocide and Human Rights Studies (MIGS), we record numerous executions of prisoners by Iranian authorities. An alarming number of capital punishments are carried out in Iran on a regular basis. The present report aims to underline the gravity of the situation by presenting the statistics on capital punishment in Iran through tables and charts. The period examined in this report includes only the first four months of the year 2013. Subsequent reports covering subsequent months will follow. The data was collected from news reports published by Iranian news agencies

such as the Human Rights Activists News Agency (HRANA), Fars News Agency (FNA) and Mehr News Agency (MNA).

2. MONTHLY EXECUTIONS

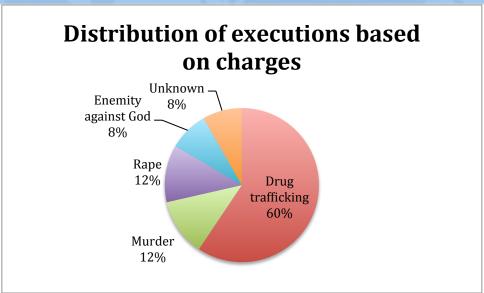

From January 1st to April 30th, 2013, a total of 133 prisoners were executed throughout Iran. 40 executions were carried out in January; 45 more took place in February; only 4 executions occurred in March and 44 executions were carried in April. The sharp decrease in the number of capital punishments carried during the month of March 2013 was due to the celebrations of the Persian New Year (*Nowrouz*). No executions took place between March 21, 2013 and April 2, 2013, period in observance of the official holiday.

3. CHARGES

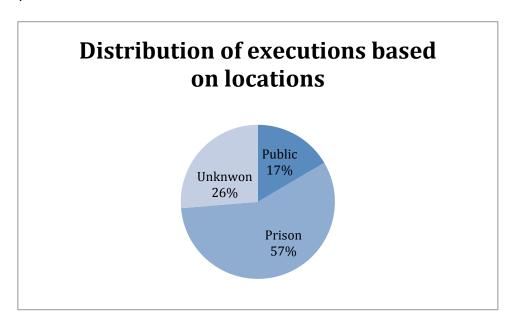

Of the 133 executions carried during the first four months of 2013, 79 were for drug-related charges; 16 for murder; another 16 for rape charges; 11 for charges of "enmity against God"; and 11 for unknown charges. Executions for drug-related charges are therefore the most prominent reason for capital punishment in Iran, with 60 % of all convicts executed for drug offenses.

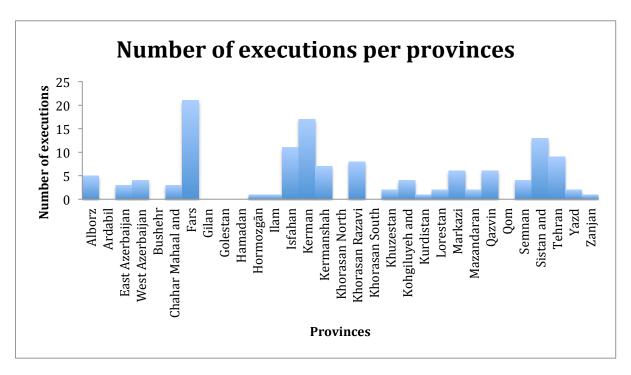

4. LOCATIONS

A total of 22 executions were carried out in public; another 76 inside of prisons; and the remaining 35 at unknown locations. Public executions were reserved for cases of murder, rape or enmity against God while drug-related offenses were usually punished behind prison walls.

5. PROVINCES

The three leading provinces in terms of executions were Fars (21 executions); Kerman (17 executions); and Sistan and Baluchistan (13 executions). Out of the 21 executions carried in the province of Fars, 4 were on charges of rape, 8 on charges of drug trafficking and 9 on charges of "enmity against God." In Kerman, drug trafficking was the leading reason for capital punishment. 12 out of the 17 executions carried in Kerman Province were for drug-related charges. The 5 other prisoners, which happened to be Baluchi citizens, were executed for unknown charges. Finally 12 prisoners convicted for drug trafficking were executed in the province of Sistan and Baluchistan while another prisoner was executed for murder.

6. CONCLUSION

Statistically speaking, an average of 33.25 prisoners were executed per month in Iran from January to April 2013. That represents slightly over one execution per day. About 60 per cent of executions documented were carried on the basis of drug-related charges. Iranian authorities have recently claimed that there are no political executions in Iran, only criminals and drug traffickers receive capital punishment. The data presented in this special report suggests they are correct. However, the widespread use of capital punishment for drug-related offenses is worrisome. With over half of executions carried out for drug-related charges, one has to question whether this does

not constitute a grave violation of human rights. We condemn this practice as inhuman and ineffective.

Table 1. Executions carried in Iran from January to April 2013.
