4. SITE HISTORY - MAJOR EVENTS & STORIES TUMBLER RIDGE

Tumbler Ridge is British Columbia's newest town founded in association with the province's last resource development "mega-project". Tumbler Ridge is located in Northeastern British Columbia on the eastern slope foothills of the Rocky Mountains. The region's coal resources were well known, but in the mid-1970s world prices prompted a flurry of interest and activity. The two mines that were established as a result are "Bullmoose" (owned by Denison Mines) and "Quintette" (owned by Teck Corporation). They are the primary employers in Tumbler Ridge with tertiary employment through services and administration in the town. The management of planning and developing the community around the new mines was undertaken by the Provincial Government, through the Ministry of Municipal Affairs. Tumbler Ridge was officially opened in 1982 and in 1998 the population was approximately 2,300. In March 2000, Quintette announced that it would be closing on August 31, 2000. (From: Housing Transition in Single Industry 'Instant Towns'. Prepared for Canada Mortgage and Housing Corporation by Greg Halseth and Lana Sullivan, 2000)

5.2 Are the following available within this site, yes or no? If appropriate, record the number (#) of these available (i.e. 10 radio stations, or 2 newspapers). Comment on any changes since 1998. Remember, in most cases this is an update from 1998, so not a lot of detail is required, except where noted.

Note: Please obtain a copy of the local paper and any newsletters, and mail them to David Bruce.

For each item determine whether or not it is located within the site boundaries (Yes/No column). If it is not, please indicate:

- which community residents travel to for these services (Community column)
- and how far it is by personal car, both in time (minutes) and distance (Time and Kms columns).

Add any additional relevant comments. For example, perhaps the elementary school has closed since 1998, or there has been a change in who provides a particular service. The key is to ask "What has changed?" of the person(s) you are speaking to.

8. COMMERCIAL SHOPPING

We want to determine the level of retail / commercial shopping in the site, and the distance and time to travel to any higher levels of retail / commercial shopping. We are roughly following Hodge / Stabler's classification scheme.

For example, if the community is a full convenience centre, write "yes" in the Yes/No column beside that description. Then for each of the four descriptions of more extensive retail / commercial centres, identify the nearest community people in this site would travel to for that level of shopping, and how far that is in terms of time and distance by personal automobile.

Description	Yes/No	If "no", how fa	ır?	Comments
