IMPROVING STUDENTS' ACADEMIC EXPERIENCE

Your course outline provides important factual information, which students need to be able to meet the requirements of any course. It can also serve as a reminder to students of all the support services that are available to help them achieve academic and personal success.

When you are reviewing your course outline at the beginning of the semester, it is a good practice to talk about these services and to point out the contact information to your students.

Students may experience academic or personal difficulties at any point during their academic career. So providing this information on all course outlines for every level of class means that if a student has a question, they can find the help they need easily.

For this reason, it is strongly recommended that a list of services (see next page) be included in every course outline.

WHAT IS A COURSE OUTLINE?

A course outline is an agreement between the professor (representing the University) and his / her students.

A course outline identifies how the course is structured, both pedagogically and administratively, and therefore must be as complete and cover as much pedagogical and administrative information as possible. The pedagogical objectives must be clearly stated.

It must explain the criteria used for grading. It must also state what is expected from students in terms of course work, preparation, assignment due dates and in-class behaviour. Sanctions must also be clearly indicated and explained.

It is recommended that all faculty members send a copy of their course outline to their Department or Unit.

10. ETHICAL BEHAVIOUR
Include the following statements:

Plagiarism:
The most common offense under the Academic Code of Conduct is plagiarism, which the Code defines as “the presentation of the work of another person as one’s own or without proper acknowledgement.” This includes material copied word for word from books, journals, Internet sites, professor’s course notes, etc. It refers to material that is paraphrased but closely resembles the original source. It also includes for example the work of a fellow student, an answer on a quiz, data for a lab report, a paper or assignment completed by another student. It might be a paper purchased from any source. Plagiarism does not refer to words alone—it can refer to copying images, graphs, tables and ideas. “Presentation” is not limited to written work. It includes oral presentations, computer assignments and artistic works. Finally, if you translate the work of another person into any other language and do not cite the source, this is also plagiarism.

In Simple Words:
Do not copy, paraphrase or translate anything from anywhere without saying where you obtained it.

I welcome meeting with all students to discuss their accessibility needs.
