ENGINEERING AND COMPUTER SCIENCE CAREER FAIR

February 5 and 6, 2019
10 a.m. to 3 p.m.
EV atrium
1515 Ste Catherine W.

For Engineering and Computer Science students and Alumni only. Bring your student ID card.
CAREER FAIR SAMPLE QUESTIONS

Meeting the people who work in the industry you want to pursue a career in is an incredible learning opportunity. The questions you ask - and the answers you receive - will help you identify the steps you need to take to reach your goal. Keep these tips in mind:

• Ask open ended questions instead of closed questions which lead to a yes or no answer.
• Target questions appropriately depending on who you are speaking to.
• Prioritize the questions that are most important to you since you will most likely only have time for a few questions.
• Listen to what others are asking so that you do not ask the same questions.

QUESTIONS FOR THE ENGINEER

• Can you tell me about a typical day?
• Can you tell me more about the projects you are working on and what you find most challenging/rewarding?
• What skills and characteristics would the ideal candidate need to obtain a position?
• How well did university prepare you for the job? Are there courses or projects you recommend?
• What makes you stand out from your competitors?
• Can you recommend any professional associations/groups (including on-line forums)?
• What advice do you have for new graduates who want to work for your company?

• What types of positions do you have trouble filling? Why?
• What kinds of projects/challenges are interns given in your company? How are they evaluated?
• What does your hiring process consist of?
• Are you hiring for positions in other Canadian or international offices?
• What are typical entry-level positions in this field? What duties and responsibilities do these positions entail?
• What is a typical career path in your company?
• What is the salary range for an entry-level position?

QUESTIONS FOR HUMAN RESOURCES (HR)

• What are you looking for in a résumé?
• What additional training, skills or certifications do you recommend?
• How do you evaluate overseas experience?
• What top skills do employees have that make them successful in your company?
• Are there any internship opportunities? Job shadowing opportunities? When is the best time to apply?
• When is your peak hiring time?

• How important is French in your workplace?
• How can I obtain an interview with your company?
• What technical skills does one need to be hired for the position?
• What are the characteristics of your most successful employees?
• Is a graduate degree necessary to advancing within your company? If so, which ones? Is a graduate degree considered an overqualification?
• What is the best way to follow up on my job application?
• Can we connect on LinkedIn?
CAREER FAIR TIPS

Career Fairs are a great opportunity to talk to companies and organizations directly and learn about job opportunities. The sooner you start planning your career, getting experience, and expanding your professional network, the better. Make the most of these networking opportunities by following these tips.

BEFORE THE FAIR

Research participating organizations

Find out about their products, services, history and operations. The full list of attending companies is posted on the career fair event page at concordia.ca/caps under the “CAPS calendar” section. Get an idea of what the company or organization does and what the company philosophy is like. Company websites are a great place to start. Try finding something that makes companies you are interested in stand out. It can be a project they are working on, a social initiative their company is partnered with or their company philosophy. Communicating this to a recruiter will make you stand out!

Check the CAPS job bank for employer postings at: concordia.ca/students/success/career-planning-services/job-bank

Don't overlook companies assuming they hire only from one discipline

Organizations need people with skills from a variety of academic majors. At the fair, ask whether the organization hires people from your major and for what positions.

Get your résumé and business cards ready

These are key networking tools that you’ll want to have up to date. Look at the concordia.ca/caps website for resources to help you build a résumé that will stand out or get help updating it by making an appointment at CAPS directly.

Have your LinkedIn profile ready for the fair

More and more recruiters are using LinkedIn to find candidates. Have your LinkedIn profile ready so you can connect with recruiters after the fair. You can include your LinkedIn information on your résumé and business card. Ask recruiters if they are willing to connect with you through LinkedIn. Be sure to send them a request shortly after the fair if they accept! Don’t forget to include specific details of your conversation in your LinkedIn message to help them remember you.

AT THE FAIR

Bring copies of you résumé

Put them in a briefcase or portfolio that you’ll keep handy. It will be easier to open these and will look more professional than a backpack.

Arrive early

Company representatives will be alert and have more energy at the beginning of the fair. Try avoiding the lunch hours when booths will be short staffed and busier.

Talk to employers about yourself and ask questions

When you speak to employers, briefly introduce yourself. You can mention your field of study, highlight some relevant projects you’ve worked on and what you’re interested in. Keep this brief and to the point. Don’t be afraid to ask more about the company and their projects, or ask specific questions.
Take that business card; don’t rely only on your memory!

Before leaving a booth, ask for the business card of the representative you spoke to. This is a good way to keep track of who you connected with and will be useful when you send them a thank you message. Ask recruiters if you can leave your card or résumé with them if you think it’s appropriate.

Before you move on to another booth, jot down brief notes about the company and the conversation you had with the company representative. Record your impressions and list items you need to follow up on.

Budget your time wisely

Prioritize companies you are interested in, but keep all of your options open. Be aware that other students will be attending the fair, and try not to monopolize representatives. If the conversation becomes lengthy, ask for the opportunity to meet the recruiter at a later date. While you wait in line, listen to questions other students are asking; you’ll avoid repeating questions and will be able to move on to more interesting questions when it’s your turn to speak. Take time to network while you wait and talk to fellow job seekers. Who have they talked to? Have they heard of anyone hiring someone with your background?

Be outgoing, friendly and positive

Networking at fairs is as much about what you say as it is about your body language. Be prepared to smile, shake hands firmly, and make eye contact with company representatives. Be yourself when interacting with employers; be enthusiastic and show interest. Use body language to show interest: stand straight and uncross your arms. Good posture and being attentive help you look excited and enthusiastic about the company.

Fairs tend to be noisy events so make sure you project enough when you speak. Make an effort to remember the recruiter’s name so you can refer to it when thanking them for their time. Ask again before you leave if you can’t remember it or look at their business card as mentioned earlier.

Dress professionally

Wear clothes that are clean and professional-looking. Avoid jeans, t-shirts, sports leggings, running shoes and baseball caps. You want to be remembered for what you said and because you looked professional! Wear comfortable shoes and by all means avoid chewing gum.

AFTER THE FAIR

Remember to thank representatives

E-mail a “Thank You” letter to employers you remain interested in. This brings positive attention to your name. Include information about your conversation and your interest in the company. Use the recruiter as the main contact with their company throughout your job search until you are referred to a different contact. For a “Thank You” letter template see: concordia.ca/students/success/career-planning-services/cv-cover-letter.html

Keep those documents

File all of the brochures, annual reports, and other materials you received from employers with your job search materials. This information can shave hours off your interview preparation. Make a note of the companies you need to research further.

Further your job search

The career counselling and career advising services available at CAPS can be a great help at every stage of the career search process. They can help you figure out what career path you want to take, what program might best suit you and even give you job search strategies and tips. Make an appointment at CAPS!

MDA is an internationally recognized leader in space robotics, satellite antennas and subsystems, surveillance and intelligence systems, defense and maritime systems, and geospatial radar imagery. MDA’s extensive space expertise and heritage translates into mission-critical defence and commercial applications that include multi-platform command, control and surveillance systems, aeronautical information systems, land administration systems and terrestrial robotics. MDA is also a leading supplier of actionable mission-critical information and insights derived from multiple data sources, both owned and operated within the Maxar group and by customer and third party sources. Founded in 1969, MDA is recognized as one of Canada’s most successful technology ventures with locations in Richmond, Ottawa, Brampton, Montreal and Halifax. MDA is a business unit of Maxar Technologies (TSX: MAXR NYSE: MAXR).
Mobeewave has created a patented solution to enable people to accept money in person using just their phones. By making it possible for anyone to easily and securely accept payment, the Montreal-based Fintech has attracted the attention of the world’s biggest payment players and technology manufacturers. Already operating in Australia, Canada, India and Poland, Mobeewave is working closely with MasterCard, Samsung, Visa and most well-known worldwide banks. Growing rapidly, Mobeewave is scaling to meet a greater number of deployments in 2018.

If you’re a Mobeewaver, you don’t take no for an answer. You’re a self-starter who likes a challenge. You’re not afraid to go beyond the tried and tested. You dare to be different. You jump at the chance to disrupt industries. You’re resourceful. You’re passionate about what you do. You’re highly motivated and you lead by example. And, above all, you value the chance to work with people with the same set of qualities.

Newtrax believes the future of mining is underground, not only because minerals close to the surface are increasingly rare, but because underground mines have a significantly lower environmental footprint. To accelerate the transition to a future where 100% of mining is underground, Newtrax eliminates the current digital divide between surface mines and underground mines. To achieve this goal, Newtrax integrates the latest Internet-of-Things and Artificial Intelligence technologies to monitor and provide insights on underground operations, including people, machines and the environment.

Because our jobs have a direct impact on people’s safety and lives around the world, we selectively surround ourselves with passionate people who share the same core values: Health, Safety & Security Global Citizenship, Teamwork & Trust, Excellence, Rigorous Financial Discipline

Transportation professionals around the world rely on INRO software to plan the urban, metropolitan and national movement of people and to help shape the future of mobility.

We’re building the next generation of mobility simulation and visualization to plan the urban, metropolitan and national movement of people and to help shape the future of mobility. Why work here?

1. We’re doing awesome things with mobility simulation and geospatial graphics
2. We control our own tech stack, so you won’t just be wrapping up someone else’s code
3. We’re nearby, in a great location with great access
4. We are already positioned in the industry with global access
5. You’ll learn from excellent technical leadership with academic and industry-recognized experts
