

CAEImmersion

Launch your future!

Registration period
April 19 – May 10

Are you looking to learn more about real-world work experience in a high technology company? Would you like to get some insight about the different career paths you can embark on?

If so, then participate in our **CAE Immersion** program to set your future career in motion!

CAE is proud to partner up with the Concordia Institute for Aerospace Design and Innovation (CIADI) to offer this unique, three-week virtual program.

Why should you participate?

CAE Immersion will prepare you for the workforce and will allow you to have a better understanding of various business realities as well as the challenges and opportunities facing innovation and technology today.

This program is an opportunity for students to exchange with industry experts, and learn about product innovation and cutting-edge development techniques, in a high tech aerospace company, through interactive workshops and self-paced activities.

CAE Immersion is part of the work-integrated learning initiatives offered by CAE.

Program eligibility requirements

- ➔ CAE Immersion is intended for all full-time students pursuing undergraduate degrees in the following programs: Aerospace Engineering, Mechanical Engineering, Computer Science, Computer Engineering, Software Engineering and Electrical Engineering
- ➔ This program is open to international students
- ➔ First, second, third and fourth-year students can register for the program
- ➔ Students who register for this program should ensure it does not interfere with other commitments (i.e., summer courses)
- ➔ **Students who have accepted to do a summer internship are not eligible to register for this program**
