Minor in Computer Science

Basic computer science skills are the perfect complement to any degree program at Concordia. The Minor in Computer Science is designed to meet the growing demand for computer-literate professionals, and may offer students more career opportunities after graduation.

This minor must be combined with a major, specialization or honours program. Generally, it is only available to students enrolled in degree programs outside of the Gina Cody School of Engineering and Computer Science.

- Minor in Computer Science (25 credits)

Students from outside the Gina Cody School of Engineering and Computer Science requesting a Minor in Computer Science must have completed MATH 203, 204 and 205 or the equivalent(s).

Requirements for the Minor in Computer Science (Subject to Admission Year)

Undergraduate Calendar, section 71.70.5 Minor in Computer Science

</table>

Students who require any of the above courses (or equivalents) as part of their major should replace these courses with elective courses chosen from the list of Computer Science Electives.

⚠️ All 200-level courses within the program which are prerequisites for other courses must be completed with a C- or higher. A 200-level course in which a student has obtained a D+ or lower must be repeated before attempting a course for which it is a prerequisite.

⚠️ It is the student’s responsibility to ensure that their course selection meets the program requirements for their graduation.

⚠️ Sections may restrict course registration to students of a specific program (i.e. SOEN). Students are advised to check the Notes block of the Class Detail listing to ensure that they are permitted to register in a given section.
Course Descriptions
Undergraduate Calendar, section 71.70.10

COMP 228  System Hardware (3 credits)
Prerequisite: COMP 248; MATH 203 or Cegep Mathematics 103 or NYA previously or concurrently; MATH 204 or Cegep Mathematics 105 or NYC previously or concurrently. Levels of system abstraction and von Neumann model. Basics of digital logic design. Data representation and manipulation. Instruction set architecture. Processor internals. Assembly language programming. Memory subsystem and cache management. I/O subsystem. Introduction to network organization and architecture. Lectures: three hours per week. Tutorial: two hours per week.
NOTE: Students who have received credit for SOEN 228 may not take this course for credit.

COMP 232  Mathematics for Computer Science (3 credits)
Prerequisite: MATH 203 or Cegep Mathematics 103 or NYA; MATH 204 or Cegep Mathematics 105 or NYC. Sets. Propositional logic and predicate calculus. Functions and relations. Elements of number theory. Mathematical reasoning. Proof techniques: direct proof, indirect proof, proof by contradiction, proof by induction. Lectures: three hours per week. Tutorial: two hours per week.
NOTE: Students who have received credit for COMP 238 or COEN 231 may not take this course for credit.

COMP 248  Object-Oriented Programming I (3.5 credits)
Prerequisite: MATH 204 or Cegep Mathematics 105 or NYC previously or concurrently. Introduction to programming. Basic data types, variables, expressions, assignments, control flow. Classes, objects, methods. Information hiding, public vs. private visibility, data abstraction and encapsulation. References. Arrays. Lectures: three hours per week. Tutorial: two hours per week. Laboratory: one hour per week.

COMP 249  Object-Oriented Programming II (3.5 credits)
Prerequisite: COMP 248; MATH 203 or Cegep Mathematics 103 or NYA; MATH 205 or Cegep Mathematics 203 or NYB previously or concurrently. Design of classes. Inheritance. Polymorphism. Static and dynamic binding. Abstract classes. Exception handling. File I/O. Recursion. Interfaces and inner classes. Graphical user interfaces. Generics. Collections and iterators. Lectures: three hours per week. Tutorial: two hours per week. Laboratory: one hour per week.

COMP 352  Data Structures and Algorithms (3 credits)
Prerequisite: COMP 232 previously or concurrently; COMP 249. Abstract data types: stacks and queues, trees, priority queues, dictionaries. Data structures: arrays, linked lists, heaps, hash tables, search trees. Design and analysis of algorithms: asymptotic notation, recursive algorithms, searching and sorting, tree traversal, graph algorithms. Lectures: three hours per week. Tutorial: one hour per week.
NOTE: Students who have received credit for COEN 352 may not take this course for credit.
