

# ELECTRICAL ENGINEERING

1- Starting academic year 2021-22 (May 2021 onwards), the department will be offering all the courses which are core to either Electrical Engineering or Computer engineering programs (except ELEC490 and COEN490) in two out of three of the terms (Either summer/fall or summer/winter or fall/winter). Courses which are offered in two out of three terms are shown in following recommended sequences in **red font**.

2- Starting academic year 2021-22 (May 2021 onwards), the department will be offering all of the courses which are core for both Electrical Engineering and Computer engineering programs (except ENGR290) in all three terms of summer, fall and winter. Courses which are offered in all three terms are shown in following recommended sequences in **blue font**.

3- Students who have been admitted and registered in Electrical Engineering or Computer Engineering programs in fall 2019 or later are required to be either in the COOP program or C-Edge program. Students in the C-Edge or COOP programs are supposed to take and pass at least in one or three workterms, respectively.

4- COOP students are supposed to follow the sequence as shown below. If a COOP student lags behind in courses due to taking low number of courses or failing in some of the courses, they have to talk to the corresponding Undergraduate Program Director for re-scheduling the COOP workterms.

5- A student who has passed ELEC390 and has only 55 credits or less to graduate is eligible to take the C-Edge workterm. This is the basis for the decision of the department in assigning the schedule for the workterm of each student.

6- C-Edge students will be informed by the COOP institute when they are supposed to take their C-Edge workterm at least one year in advance of their scheduled workterm date. This is based on the decision of the department which will be updated every four months by checking the eligibility of students considering earned credits.

7- For C-Edge students, an example of a 4-year sequence is given below. According to this sequence from Summer Year 2, these students should follow the sequence that corresponds to their assigned work term.
