May 1, 2020

Subject: Important Notes and Curriculum Changes in the 2020-2021 UG Calendar

Dear Student,

Each May, all students enrolled in our Aerospace Engineering program are sent a letter advising them of curriculum changes that have occurred since their entry into the program. As such, the present letter is to advise you of changes to your program that will appear in the 2020-2021 Undergraduate Calendar.

It is important to read this entire letter, as these changes may affect your selection of courses or potentially your graduation. Students must meet the requirements of their program according to the calendar of their graduating year.

This letter, as well as past ones, can be found on the following website: http://www.concordia.ca/enсs/students/sas/undergrad-program-info/course-sequences/aerospace.html

Should you have any questions regarding this letter and any of the curriculum changes therein, please do not hesitate to contact your Undergraduate Program Assistant, Ms. Sabrina Poirier:

- By email at mie-upa@encs.concordia.ca;
- By phone at 514-848-2424 extension 3133; or
- In-person in room EV 4.144.

Please be reminded that you can always consult your program requirements and course descriptions by referring to the following website: http://www.concordia.ca/academics/undergraduate/calendar/current/sec71.html

Please read the following pages carefully.
VERY IMPORTANT:

1. Students must have completed all 200-level courses required for their program before they can register for any 400-level course.

2. All 200-level courses within the program, taken after September 1, 2012 which are prerequisites for other courses, must be completed with a C- grade or better. A 200-level course in which a student obtained a D+ grade or lower must be repeated before attempting any course for which this 200-level course is a prerequisite.

3. Any courses that you are required to repeat due to conditional standing or readmission conditions must be completed with a grade of C- or better prior to graduation. This requirement will not be waived.

4. Students are required to graduate having met the substantial equivalent of the curriculum in force in the winter term prior to their degree conferral.

5. Students may now submit a request to write a supplemental exam, pending on meeting the requirements highlighted in section 71.10.3 of the 2018-2019 Calendar. Meeting the conditions does not guarantee the approval of the request.

6. In order to graduate, students must:
   i. Satisfy all their program requirements;
   ii. Be in acceptable standing in their last annual assessment; and
   iii. Have a minimum final graduation GPA of 2.00.

   The academic standings of potential graduates who have attempted less than 12 credits since their last assessment are determined on the basis that these credits constitute an extension of the last assessment period.

7. Graduation does not occur automatically and you must apply for graduation. The application form can be found at: http://registrar.concordia.ca/convo/gradapp.html.

   The deadlines to apply for graduation are:
   • January 15th for Spring Convocation; or
   • July 15th for Fall Convocation.

8. MATH 202 is no longer required for students in the Extended Credit (ECP) or Mature Entry ( MEP) programs.
1. **Engineering Core**

   - No changes have been made to the Engineering core.

2. **Aerospace Engineering Core**

   The changes below for the Aerospace Engineering Core took place in the 2019-2020 academic year and are presented here as a reminder:

   - **AERO 290 (3 credits)** has been added, it is a new course that is now offered in the winter semester of the 2nd year and is a pre-requisite to AERO 390.
     - As a transitional measure, students who have been admitted/transferred to the AERO program (any option) for FALL 2018 or after are required to take AERO 290 as part of their program requirements. As a result, those same students are now required to take 3 credits less of AERO Option Electives.
     - Students who have been admitted/transferred to the AERO program (any option) prior to FALL 2018 are NOT required to take AERO 290 as part of their program requirements. As such their technical elective requirements do not change.

3. **Aerospace Engineering Options Core**

   There are changes to the Aerospace Engineering Option Core courses:

   - The following courses have changed designation:
     - MECH 215 is now MIAE 215
     - MECH 211 is now MIAE 211
     - MECH 221 is now MIAE 221
     - MECH 313 is now MIAE 313
     - MECH 311 is now MIAE 311

   - Students in Aerospace Engineering are required to complete a total of at least 56.75 credits from their Option courses. These credits are split into Option Core and Option Electives. The option core requirements are as follows:
     - **Option A – Aerodynamics & Propulsion:** Students are required to complete 50.25 credits of Option A Core courses.
     - **Option B – Aerospace Structures & Materials:** Students are required to complete 54.00 credits of Option B Core courses.
     - **Option C – Avionics & Aerospace Systems:** Students are required to complete 41.50 credits of Option C Core courses.
4. **Aerospace Engineering Option Elective Courses**

There are changes to the Aerospace Engineering Option Elective courses:

- ENGR 411 has been added to the Aerospace Engineering Option Elective courses.

**Option A – Aerodynamics & Propulsion**
- Students are required to take 6.5 credits of Option A Elective courses.
- MECH 463 has been removed from Option A Elective courses.
- AERO 444 has been removed from Option A Elective courses.

**Option B – Aerospace Structures & Materials**
- Students are required to take 2.75 credits of Option B Elective courses.
- MECH 426 has been added to Option B Elective courses.
- AERO 485 has been removed from Option B Elective courses.
- AERO 446 has been removed from Option B Elective courses.
- AERO 444 has been removed from Option A Elective courses.

**Option C – Avionics & Aerospace Systems**
- Students are required to take 15.25 credits of Option C Elective courses.
