

NEW! GATEWAY TO RESEARCHERS AND THEIR PUBLISHED WORKS

# RESEARCHERID.COM

A GLOBAL COMMUNITY WHERE RESEARCHERS CONNECT

## WHAT IT DELIVERS

- A custom author identifier number and search system in a free, safe, and secure environment
- A way to identify the complete body of published works for specific researchers
- Easy access to standardized, clarified author names and citation information
- Resolution of author misidentification
- An opportunity to manage public presentation of your work
- Access to a global, multidisciplinary scholarly research community

## WHAT YOU CAN DO

- Search the author registry to locate colleagues and view their profiles
- Find citations, collaborators, key thought leaders, speakers, editors, and reviewers
- Track citation counts, average citations, and h-index for ResearcherID participants
- Register to manage your own publication lists and share with others in *EndNote Web*®
- Share your personal publication URL with others – include it in your e-signature
- Explore citation maps to see how research is used globally

## A BETTER WAY TO ASSOCIATE AUTHORS WITH THEIR PUBLISHED WORKS

ResearcherID provides the global research community with an invaluable index to author information. By assigning a unique identifier to each author who participates, ResearcherID standardizes and clarifies author names and citations and makes your information search more straightforward and accessible.

By using ResearcherID, you'll be able to easily find authors' full bodies of work, avoiding the common problem of author misidentification. You'll be assured of finding the right author — and of finding a complete listing of his or her work. Whether you are seeking citations for research, or leads to collaborators, thought leaders, speakers, editors, or reviewers, the unique ResearcherID will provide you with a clear avenue to the data you need.

## AN OPEN SOLUTION FOR THE SCHOLARLY COMMUNITY

### Making vital research more accessible

ResearcherID gives researchers a secure place to manage and share their professional information. Authors can obtain an ID during a one-time registration process. Registering with ResearcherID expressly associates an author with his or her published works

— without confusion over nomenclature or any changes in institutional affiliations during one's career. Plus, ResearcherID supports the Unicode (UTS-8) standard, enabling researchers worldwide to conduct searches and upload publication lists in their own language.

Researchers have total control over the privacy of their profile and publication lists. This information can be made freely available to the global research community.

## SEARCHING THE RESEARCHERID REGISTRY

### Straightforward access to author information

ResearcherID is one of the many valuable tools and services offered by Thomson Reuters to ease and enhance researchers' daily workflows. Registered and non-registered users can use ResearcherID to:

- View profiles of authors who have chosen to make their profiles public
- Search via the unique ResearcherID number or by any combination of first name, last name, keywords, address, and institution
- Search by keyword — using your own, or by clicking on any term in the keyword list on the ResearcherID homepage
- Link to the full text
- Track citation counts, average citations, and h-index for ResearcherID participants

### ResearcherID homepage

ResearcherID heightens communication among researchers in all disciplines, increasing their visibility and making their work more accessible.

### Author profiles

View author profiles, full-text articles, citations, and more.

As times cited and citation metrics are updated within *Web of Science*®, this information is also automatically updated in ResearcherID. This assures users of the most current and accurate analytical research information.

**RESEARCHERID LABS:  
A UNIQUE INTERACTIVE ENVIRONMENT**

ResearcherID Labs offers dynamic tools to further publicize an author's work and explore scholarly collaboration and citation relationships around the world. The Badge feature creates a graphic for placement in most online environments, allowing an easy way to view an author's most recent publications and link directly to their profile in ResearcherID. The Collaboration and Citing Articles Networks visually display these relationships based on *Web of Science* data from the author's publication list.

**Author citation metrics**  
Track author influence and discover emerging leaders in your field.

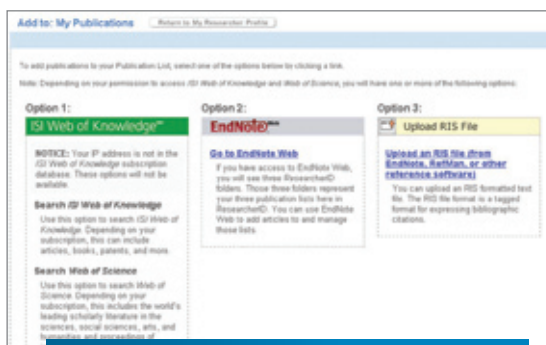

**RESEARCHERID WEB SERVICES TOOLS  
FOR ADMINISTRATORS**

ResearcherID is more than an index for accurate author information and publication lists. With the new Web Services tools administrators can help their busy researchers and increase visibility of their work by creating ResearcherID profiles for them and suggesting publication lists. Once profiles and publication lists are built administrators can then extract their researchers' portfolios, including Times Cited counts for articles indexed in *Web of Science*.

**INNOVATIVE TOOLS AND SERVICES  
An evolving resource**

Thomson Reuters is developing ResearcherID to be a best-in-class virtual author community. Plans call for providing additional innovative functions to help customize and augment researchers' experience to better manage quality research output and global scholarly collaboration.

**Build & share your publication list**  
Create multiple publication lists. Plus, now you can manage and share these lists with colleagues in *EndNote Web*®.

**DISCOVER RESEARCHERID TODAY!**

Join the fastest-growing online community dedicated to accurate author identification and multidisciplinary, scholarly research collaboration. Authorized, signed-in *ISI Web of Knowledge*™ users have direct access to ResearcherID.
