Program Overview
Concordia University is pleased to announce a call for proposals for the 2019 edition of the Petro-Canada Young Innovator Awards.

The Petro-Canada Young Innovator Awards (PCYIA) recognize, promote, and support outstanding and innovative emerging researchers whose work contributes significantly to the training environment of the University and has an impact on society at large. This annual award, made possible by Suncor Energy’s generous endowment to Concordia University, is intended to articulate the commitment of Suncor Energy and Concordia to support researchers at the launch of their scholarly careers, and enable them to carry their research forward.

The competition is open to all subject areas related to Concordia’s new Strategic Research Plan.

The recipients will each receive a $10,000 research award and hold the title of Petro-Canada Young Innovator for one year.

Eligibility
Full-time tenure-track faculty members at Concordia are eligible to apply from the start of appointment until their fifth year (in the 2018-2019 competition, this refers to appointments starting in January 2014 or more recently) and who obtained their highest academic degree within the last seven years (January 2012 or more recently).

Time spent in a non tenure-track position, such as Lecturer, LTA, or postdoctoral fellow, does not count towards the period of eligibility.

Faculty members holding research chairs or special research professorships are ineligible to apply because of their unique status that already includes research support and protected time for research.
OFFICE OF THE VICE-PRESIDENT, 
RESEARCH AND GRADUATE STUDIES

A faculty member can only be awarded the PCYIA once. Unsuccessful nominations can be resubmitted if all eligibility criteria are met. A faculty member cannot be nominated for a PCYIA and submit an application for the University Research Awards program in the same year.

Nomination and Submission
Each Faculty prepares a call for proposals inviting faculty members to submit applications to the PCYIA competition. In the call, each Faculty indicates the internal deadline to receive applications. The respective Faculty Research Committee (or the equivalent) selects among the applications and submits their recommendations to the Office of the Vice-President, Research and Graduate Studies by Monday, April 1, 2019 at 12 p.m.

Applications to the Faculty must include:
• A lay summary of the proposed project (1 page);
• A description of the project addressing: objectives and expected outcomes, activity plan with a timeline, and significance (up to 5 pages);
• List of References (1 page);
• Budget and justification of expenses;
• A letter of recommendation from a colleague highlighting the innovative aspect of the proposed project (up to 2 pages); and
• Free form CV maximum number of pages is 20 (standard formats such as the Canadian Common CV - both versions - or CVs by the major funding agencies are recommended).

The recommendation by the Faculty to the OVPRGS must include:
• A complete dossier of the selected application(s) (as described above); and
• A separate recommendation letter for each application by the Faculty Dean’s office describing the reasons for selecting the candidate(s), the quality and innovative aspect of the research/creation, the contribution to their field, and fit with the Strategic Research Plan (up to 2 pages).

Dossiers received will be considered by the University Research Committee who will determine the final awards.

Conflict of interest
The Committee members cannot be in a situation of conflict of interest with respect to a candidate. Conflict of interest includes, but is not limited to, having collaborated (i.e., published or been a co-researcher) with the applicant in the last six years, being involved in the proposed research, or providing a letter of support as part of the application dossier. The Committee members must disclose any conflict of interest to the Chair of the committee prior to the start of the adjudication process.

Evaluation criteria
The recommended proposals, received by the Committee, are evaluated on the following points:
• Quality and innovative aspect of the proposed project;
• Expected outcomes;
• Impact on graduate student training;
• Overall research/creative activity promise of the applicant; and the
• Appropriateness of project scope and budget.
OFFICE OF THE VICE-PRESIDENT,
RESEARCH AND GRADUATE STUDIES

Should the Committee determine that nominations in a given category or year do not warrant the title of Petro-Canada Young Innovator, the award will be withheld for that competition.

Award administration and Reporting
After the award announcement, the funds will be released upon verification that any compliance requirements (human ethics, etc.) are met. The funds will be made available in a research account following the award announcement.

The awarded funds are normally spent within two years of the award notice. If the project is not completed within the time frame, the grant holder must contact the Office of Research (OOR). An award cannot be transferred to another faculty member, a research unit, or a department. In general, only the proposed research project should be supported with the awarded funds, however, small modifications to the approved project are allowed. If a project is terminated before completion, the remaining funds will be returned to the Program envelope.

Reporting and Communication
Each award recipient must submit a brief report, within six months of the end date of the award, to the OOR, outlining how funds were spent, specific outcomes including training of students, and how the award contributed to the recipient’s overall research activities.

The University will advise Suncor Energy, in writing, of the selection decisions as soon as they are made and provide a copy of the winners’ abstracts. If a recipient’s work is particularly relevant to Suncor Energy, the company may wish to continue communications with the award recipient and receive a copy of the final report.
