## Sample Ph.D. Abstract

### ABSTRACT

#### **Meaning-making dynamics within and across workgroups: An inquiry into the creation and movement of usable knowledge in a long-term care facility in Ontario**

**John James Conklin, Ph.D.**

**Concordia University, 2009**

This dissertation reports the results of a qualitative investigation of the meaning-making patterns that occur in a group of caregivers in a long-term care home. The research design included an ethnographic component to reveal the overall meaning-making dynamic in the site, and a case study focusing on a specific improvement initiative. Data was gathered over a three month period through observation, interviews, and documents. Data analysis included the creation of analytic memos, categorizing and theming, and the development of a meaning-making map to depict systematic interactions. The findings suggest that research participants have developed systemic patterns of meaning making that allow them to create experiences of coherence, purpose, identity, and competence. Eight meaning-making themes emerge from the analysis to reveal a workplace where emphasis is placed on immediate concerns and priorities, and where long-term planning and change are problematic. Caregivers begin each day by creating a coherent picture of their workplace, and they engage in brief, pragmatic interactions throughout the day to maintain their shared understanding of the unfolding context around them...
