Journal Publications (Peer-Reviewed)

Authorship: ^{†§} indicates senior authorship. Italicized names are trainees or highly qualified personnel (HQP) that work with me. In my field publishing with students/HQP is encouraged and is the norm.

*indicates equally shared first authorship.

Article Length: The quintessential mode of disseminating research work in my field is through publishing in peer-reviewed journals. The length of the articles published in these journals varies, is often less than 10 pages, and is not reflective of the quality or importance of information presented.

Journal Selection: The journals selected for publication are based on a combination of impact factor and target audience. Journals such as *Obesity Reviews*, *Journal of Clinical Endocrinology and Metabolism*, *Journal of Lipid Research*, *American Journal of Clinical Nutrition*, *Scientific Reports*, and *International Journal of Obesity* are among those that have the highest impact factor in their respective fields.
